

Kelly Kettle® ADVENTURER 2

CONTENTS TENT BODY / TENT RAIN FLY / POLES (2) / GUYLINES (2) / STAKES / PEGS (12) / REPAIR KIT

1.

Roll out the TENT BODY and separate the TENT RAIN FLY.

2.

Before staking out the ends of the TENT BODY, assemble the 2 POLES and insert them into the sleeves & grommets.

3.

Now stretch and stake down the ends. The TENT BODY will stand up and take its finished shape.

4.

Cover with the TENT RAIN FLY and secure via the 6 buckles (4 narrow end, 2 wide end).

5.

Stake the doors on each side to create vestibules and stake the GUYLINES at either end.

Tips

Choose a site that is relatively flat, safe from flooding and free of overhanging branches and other threats like Wasp or Bee Hives.

Clear the tent site of rocks, pebbles & fallen branches to create a smooth bed.

Storage

Clean your tent by hand washing only with warm water and mild soap (no detergents).

Ensure the tent is completely dry before storing away in a dry location.

Warranty

All Kelly Kettle Tents are covered by limited 1 year manufacturer's warranty. Please visit our website.

Kelly Kettle® TRAVELLER 3

CONTENTS TENT BODY / TENT RAIN FLY / POLES (3) / GUYLINES (6) / STAKES / PEGS (16)
GROUND SHEET FOR VESTIBULE / REPAIR KIT

1.

Spread out the TENT RAIN FLY to be pitched first. Identify the door which will be to the front.

2.

Assemble the long poles and short pole.

3.

Insert the long poles into the sleeves to form an 'X' shape running corner to opposite corner. Insert the shorter pole into the sleeve across the front.

4.

Insert the end of the poles into the respective grommets and the tent will rise and take shape

5.

Stake out the door to create the front vestibule. Stake around the TENT RAIN FLY and stake out the GUYLINES. Open the vents at the top to allow for ventilation.

Tips

Choose a site that is relatively flat, safe from flooding and free of overhanging branches and other threats like Wasp or Bee Hives.

Clear the tent site of rocks, pebbles & fallen branches to create a smooth bed.

6.

Bring INNER TENT in under the TENT RAIN FLY. Identify front door of INNER TENT so that it will be facing the opening of the TENT RAIN FLY. Connect buckles at the 4 corners of the INNER TENT, with matching ones on the TENT RAIN FLY.

7.

Suspend INNER TENT using loop and toggle hanging system.

8.

Insert ground sheet if required to vestibule using loop and toggle system.

Storage

Clean your tent by hand washing only with warm water and mild soap (no detergents).

Ensure the tent is completely dry before storing away in a dry location.

Warranty

All Kelly Kettle Tents are covered by limited 1 year manufacturer's warranty. Please visit our website.

Kelly Kettle® FAMILY 5

CONTENTS INNER TENT BODY / TENT RAIN FLY / POLES FOR RAIN FLY (3 large with color coded ends) POLES FOR CANOPY (1) / GUYLINES (13) / STAKES / PEGS (25+) / GROUND SHEET FOR VESTIBULE / REPAIR KIT

1. Spread out the TENT RAIN FLY to be pitched first. Identify the large front door and face it in the required direction. Assemble and insert the 3 LARGE POLES into their corresponding color coded sleeves. The sleeve ends are color coded Black, Yellow & Grey (front front to back).

2. Loosely stake down the back of the TENT (opposite end to the large front door) in a couple of positions. This will help later with assembly. Secure the ends of the POLES in position by placing them over their respective pins. Inserting the second end of the POLE requires a little strength. At this stage, everything is still flat on the ground.

3. This step is easier with 2 people. Lift and pull on the front of the TENT RAIN FLY. The TENT will rise up and start to take shape. Walk the poles forward (away from the loosely staked end) toward the front of the TENT to stretch the fly out. Once happy with the Tunnel shape, stake down securely all around.

4. Insert & secure the small POLE in the sleeve above the front door to create the CANOPY.

Stake any remaining GUYLINES.

Attach clips to the side POLES

5. Install the INNER TENT BODY (sleeping area) using the toggle and ring clip hanging system. Identify the large front doors of the INNER TENT so that they are facing the vestibule. Attach the 2 red toggles on the INNER TENT to the 2 red rings on the RAIN FLY. This centers the INNER TENT correctly.

Tips

Choose a site that is relatively flat, safe from flooding and free of overhanging branches and other threats like Wasp or Bee Hives.

Clear the tent site of rocks, pebbles & fallen branches to create a smooth bed.

6. Secure the INNER TENT floor at each corner using the 4 plastic hooks. Connect 2 hooks at the rear to the 2 rings on the TENT RAIN FLY. Connect 2 hooks at the front to the metal rings which support the poles. Complete suspending the INNER TENT.

7. Insert GROUND SHEET to vestibule and secure at the 4 corners using either the plastic hooks, or the toggle & ring system.

Storage

Clean your tent by hand washing only with warm water and mild soap (no detergents).

Ensure the tent is completely dry before storing away in a dry location.

Warranty

All Kelly Kettle Tents are covered by limited 1 year manufacturer's warranty. Please visit our website.

Kelly Kettle® CLANN 6

CONTENTS TENT BODY (2) / TENT RAIN FLY / POLES FOR RAIN FLY (4) / POLES FOR CANOPY (2)
GUYLINES (12) / STAKES / PEGS (20+) / GROUND SHEET FOR VESTIBULE / REPAIR KIT

1.

Spread out the TENT RAIN FLY to be pitched first. Assemble the 4 POLES and insert them into the grey sleeves which are located each side of the doors. The doors (2) are located in the center of the tent.

2.

Loosely stake down a GUYLINE at each end of the TENT RAIN FLY. This will help with the assembly.

3.

Secure the ends of the POLES in position by placing them over their respective pins. Inserting the pins at each end may require a little strength.

4.

The TENT RAIN FLY will rise and take shape once the pins are inserted. Stake down RAIN FLY and GUYLINES.

5.

Bring first TENT BODY in under the TENT RAIN FLY and commence installation of the first sleeping area. Identify front door of TENT so that it will be facing the center vestibule. Connect the matching buckles on the fly and TENT BODY at 4 corners.

6.

Suspend TENT using ring and toggle hanging system. Yellow Toggle to Yellow Ring, etc. Repeat with second TENT BODY at opposite end.

7.

Insert GROUND SHEET (if required) to vestibule and stake down.

8.

If canopy is required, assemble POLES, insert into grommet in door and secure using GUYLINES.

Tips

Choose a site that is relatively flat, safe from flooding and free of overhanging branches and other threats like Wasp or Bee Hives.

Clear the tent site of rocks, pebbles & fallen branches to create a smooth bed.

Storage

Clean your tent by hand washing only with warm water and mild soap (no detergents).

Ensure the tent is completely dry before storing away in a dry location.

Warranty

All Kelly Kettle Tents are covered by limited 1 year manufacturer's warranty. Please visit our website.

Kelly Kettle® BEACH SHELTER

CONTENTS TENT BODY / POLES (3)

1.

Spread out the TENT BODY. Identify the front opening and locate the relevant pole sleeves.

2.

Assemble 3 POLES (2 short and 1 long).

3.

Insert the 2 short POLES (parallel to each other) through the sleeves running front to back.

4.

Insert the long pole across the TENT perpendicular to the 2 shorter POLES. This long POLE must cross over the top of the short POLES.

5.

Insert the long pole into the webbed pockets at either end. Lift and arch the middle of the POLE to allow the TENT to take shape. Insert the shorter POLES into their webbed pockets at each end.

6.

If required, close up the front using the 2 simple loop connectors.

Tips

Choose a site that is relatively flat, safe from flooding and free of overhanging branches and other threats like Wasp or Bee Hives.

Clear the tent site of rocks, pebbles & fallen branches to create a smooth bed.

Storage

Clean your tent by hand washing only with warm water and mild soap (no detergents).

Ensure the tent is completely dry before storing away in a dry location.

Warranty

All Kelly Kettle Tents are covered by limited 1 year manufacturer's warranty. Please visit our website.
